~~SECRET~~/NOFORN

PROJECT SUN STREAK

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

PROJECT NUMBER: 8937

SESSION NUMBER: 002

DATE OF SESSION: 02 Jan 90

DATE OF REPORT: 2 Jan 89

START: 1055

END: 1125

METHODOLOGY: Solo

VIEWER IDENTIFIER: 095

1. (S/NF/SK) MISSION: Describe physical characteristics, interior, and purpose of a target structure, and its surroundings, designated by encrypted coordinates 893292/733830.
2. (S/NF/SK) VIEWER TASKING: Reaccess structure reported in Session 1 and provide further information on interior layout and details, as well as purpose.
3. (S/NF/SK) COMMENTS: See attached summary
4. (S/NF/SK) EVALUATION:
5. (S/NF/SK) SEARCH EVALUATION:

HANDLE VIA SKEET CHANNELS ONLY

~~SECRET~~/NOFORN

CLASSIFIED BY: DIA (DT)

DECLASSIFY: OADR

*Ch! Need overhead description  
(sketch) of the immediate surroundings  
of the target from an appropriate,  
overhead perspective.*

WORKING PAPER

S: 2

#### SUMMARY OF INFORMATION

The interior structure has narrow hallways and numerous cubic rooms. The structure has a high metal content similar to a Faraday cage. The structure has feelings of motion and energetics/electrical energy associated with it. The structure is filled with electronic/electrical equipment and cables and sheathing is visible. Also present are wires and boards with rows of holes/sockets in which things are plugged in. Lighting is dim and in the form of florescent lights--the kind where the long, tubular bulbs are exposed. There are many green, luminous screens reminiscent of computer monitors or radar screens. There are of specially designed pieces of equipment here. One item is like a computer, however, it only analyzes one thing; it's programmed hardware and software-wise for one function: to sort out signals and find the right one. It does this based on the electrical waveform. The main purpose of the activity in the structure is to study, analyze, collect, monitor, sort, categorize, refine, identify, and classify all different types of electromagnetic radiation/signals. The structure has a military feel though some civilians work here. The work is an application but some research is still done. The research involves improving existing equipment/technique for the purpose of refining signature identification.
